

Touring & Fishing

Aquatx Cobra Touring and Fishing Kayaks are unique because they offer a range of specialist accessories to configure your kayak to your own needs for sports fishing and distance touring.

Aquatx Cobra Fish n' Dive

Length: 3.8m Width: 914mm Weight: 28kg Capacity: 272kg

The Aquatx Cobra design team have combined a modified deck with the stable hull design of the Aquatx Tandem and created the Aquatx Cobra Fish n' Dive multi-platform fishing kayak.

Ideal for day fishing, the kayak features one centrally located seat and a smaller reverse companion jump seat near the bow for another passenger or additional gear. There is no other kayak on the market this size that offers as much storage space. A large well is located in the stern and holds up to three tanks. Scuba divers love this unique arrangement that allows for heavy loads and provides a stable exit and re-entry platform.

Aquatx Cobra Pro Fisherman

Length: 4.1m Width: 730mm Weight: 24kg Capacity: 205kg

For long-reach fishing expeditions the Pro Fisherman is the ideal Kayak. 700mm longer than the Fish n' Dive, the Pro Fisherman has a narrower beam and is lightweight at 24kg. This means a fast manoeuvrable kayak able to handle more challenging sea conditions.

Flat deck space means multiple hatch options with the tank well to hold dive bottles or overnight camping gear.

Aquatx Cobra Marauder

Length: 4.3m Width: 780mm Weight: 24kg Capacity: 144kg

The Cobra Marauder is a pure performance fishing kayak from every angle and offers excellent initial and secondary stability as well as a super silent hull design for stealth paddling around easily spooked fish. Longer again than the Pro Fisherman, the Marauder features ample rocker providing manoeuvrability and smooth paddling as well as stability during surf launches and landings, yet the keel design and tracking channels in the hull make for excellent tracking.

Add to that a large user friendly deck design with self-draining foot-wells, forward and rear flush mount or surface mount rod holder positions, customisable deck space for different layout and hatch configurations and a comfortable cockpit with dry seating area. 'Quick drain' scupper holes provide for fast draining in choppy seas. The Marauder also features a gigantic tank well with moulded in bait/gear bucket recess.

Touring & Fishing

Apart from the largest hatches on the market, all Aquatx Cobra Fishing and Touring Kayaks can be fitted with an optional motor bracket for an electric trolling motor. And there is still plenty of room left for rod holders, scuba gear, twelve volt battery, tackle box, bait tank, catch bag, fishing rods, clothing and much more.

Aquatx Cobra Tourer

Length: 4.6m Width: 711mm Weight: 23kg Capacity: 216kg

Designed as a performance sit-on-top touring kayak, the Aquatx Cobra Tourer is for the athletically inclined paddler who wants to go the distance with maximum efficiency and speed. Its versatility makes it an ideal choice for training, long distance sight-seeing or touring on moderate ocean swells, lakes and rivers.

This kayak has it all, even an adjustable leg length rudder system. The low profile hull of the Aquatx Tourer cuts down on windage, enabling paddlers to maintain high speed and straight tracking with easy handling in all conditions. The integrated keel provides stability and efficiency, holding a straight course even in choppy water. It incorporates a large dive tank well for easy accessibility and extra storage.

Aquatx Cobra Expedition

Length: 5.5m Width: 597mm Weight: 22kg Capacity: 193kg

At 5.5m long, the Aquatx Expedition is designed to go fast. Built for the performance paddler, it accelerates quickly and gets to its top speed in a short period of time. This boat has lots of storage and is ideal for any paddler interested in performance touring, sea kayaking and long distance cruising.

A high level of paddling efficiency enables Aquatx Expedition paddlers to travel longer distances in a shorter time with less physical effort. The long narrow waterline allows the hull to slide easily, quickly and smoothly through the water with minimal effort. The low profile deck is a unique feature for a sit-on-top and greatly cuts down on windage. A V-shaped keel and an adjustable leg length rudder system provide improved tracking and stability.
